

Architectural Modification Request

Architectural Modifications are generally required for any modification of the home or landscaping, including any modification to the outside appearance of the home. This often includes any painting, and roofing, even if the painting is the original color. A color swatch from the paint manufacture must be attached to the Modification Request and mailed in. Computer submittals are not accepted due to the variation in compute monitors color rendition capabilities.

Check your covenants for specifics. It is always prudent to submit a Modification request for any changes or upgrades on the outside of the home. This also includes landscaping changes such as planters, tree removals and/or shrubbery. The rule of thumb is to check before you change anything.

Your Modification request can be found on your community web site. If it is not, call the office at 678-407-1115 and ask.
